

BATTLE STREET JOURNAL

The robots are coming!

Latest build status information

by [Jonathan Collazo](#) on March 1st, 2022

This newsletter will serve as a way to update you as our partner in this project.

THIS WEEK'S
TOP STORIES

Application Deadline

All application requirements have been met!

Mechanical drawings, wiring diagrams, and exterior design have been submitted for approval by the Battlebots Team. We have already heard back from the CEO of Battlebots, showing excitement after 1st looks.

What's Next?

Time to build! We have received enough parts to start live testing the current drive train. Due to the complexity of the weapon, we are currently using 2d dynamic motion software before any live testing. Once testing begins, we will share videos or pictures of the progress.

Thank you for making history with us!
